No-code | Deepdive

"Much like LEGO, the spirit of no-code is to empower builders"

No Code is exactly what it sounds like: technology that enables you to build digital products without the need for any coding, allowing even non-technical people to use software without having to write a line of code.

Low Code Versus No-Code

Coded or Low Code solutions

- Cost | Require specialist skillset and talent. Heavily reliant on in-house teams and substantial costs for hiring
- **Slow** | When making a simple change, such as question sets or documentation, changes can take months
- **Inefficient** | Replicating work
- **Hard** | Difficult to fix if issues arise

No-Code solutions

- Speed | Build and launch products in weeks,
 make changes to question sets, underwriting
 rules and documentation instantly
- **Ease** [All configuration is visual (so codeless)
- **Simple** |User friendly, portal and dashboard
- Drive ROI | Ability to bring in-house, creating a Centre of Excellence to ensure no reliance whatsoever on the vendor!

Benefits of no-code

With no-code, you don't have to choose between speed to market, cost, or quality. Insurers can benefit from :

USE CASE | Hiscox

A redesigned broker experience to fast-track quoting times

The Challenge

The Outcome

The team was using multiple platforms, creating high operating costs and lack of control

They needed the ability to launch new products, efficiently

They sought a re-usable, centralized platform that could be applied across different business units and geographies Using a cooperative build, the team built their first products

Rapidly migrated existing books of business to the INSTANDA platform

Immediately achieved goal of establishing own digital CoE

Able to innovate & react to market demands and improve customer experience

"INSTANDA is an end-to-end digital platform responding to a strong market need in a unique way. Our first car product in Germany was built in just 10 weeks. Our second product, with more channels, was built in just 6 weeks."

- Stéphane Flaquet, Hiscox European CEO

USE CASE | Standard Bank

Launch products to market quickly and in a cost-effective way

"We were drawn to INSTANDA's ability to launch products to market quickly and in a costeffective way. For us, INSTANDA was the obvious choice as an agile solution, which will enable us to increase our ability to quickly change rates, product rules, user experience and address market demands." - Leon Vermaak, Global Head of Standard Bank Insurance
