Improving the Customer Journey

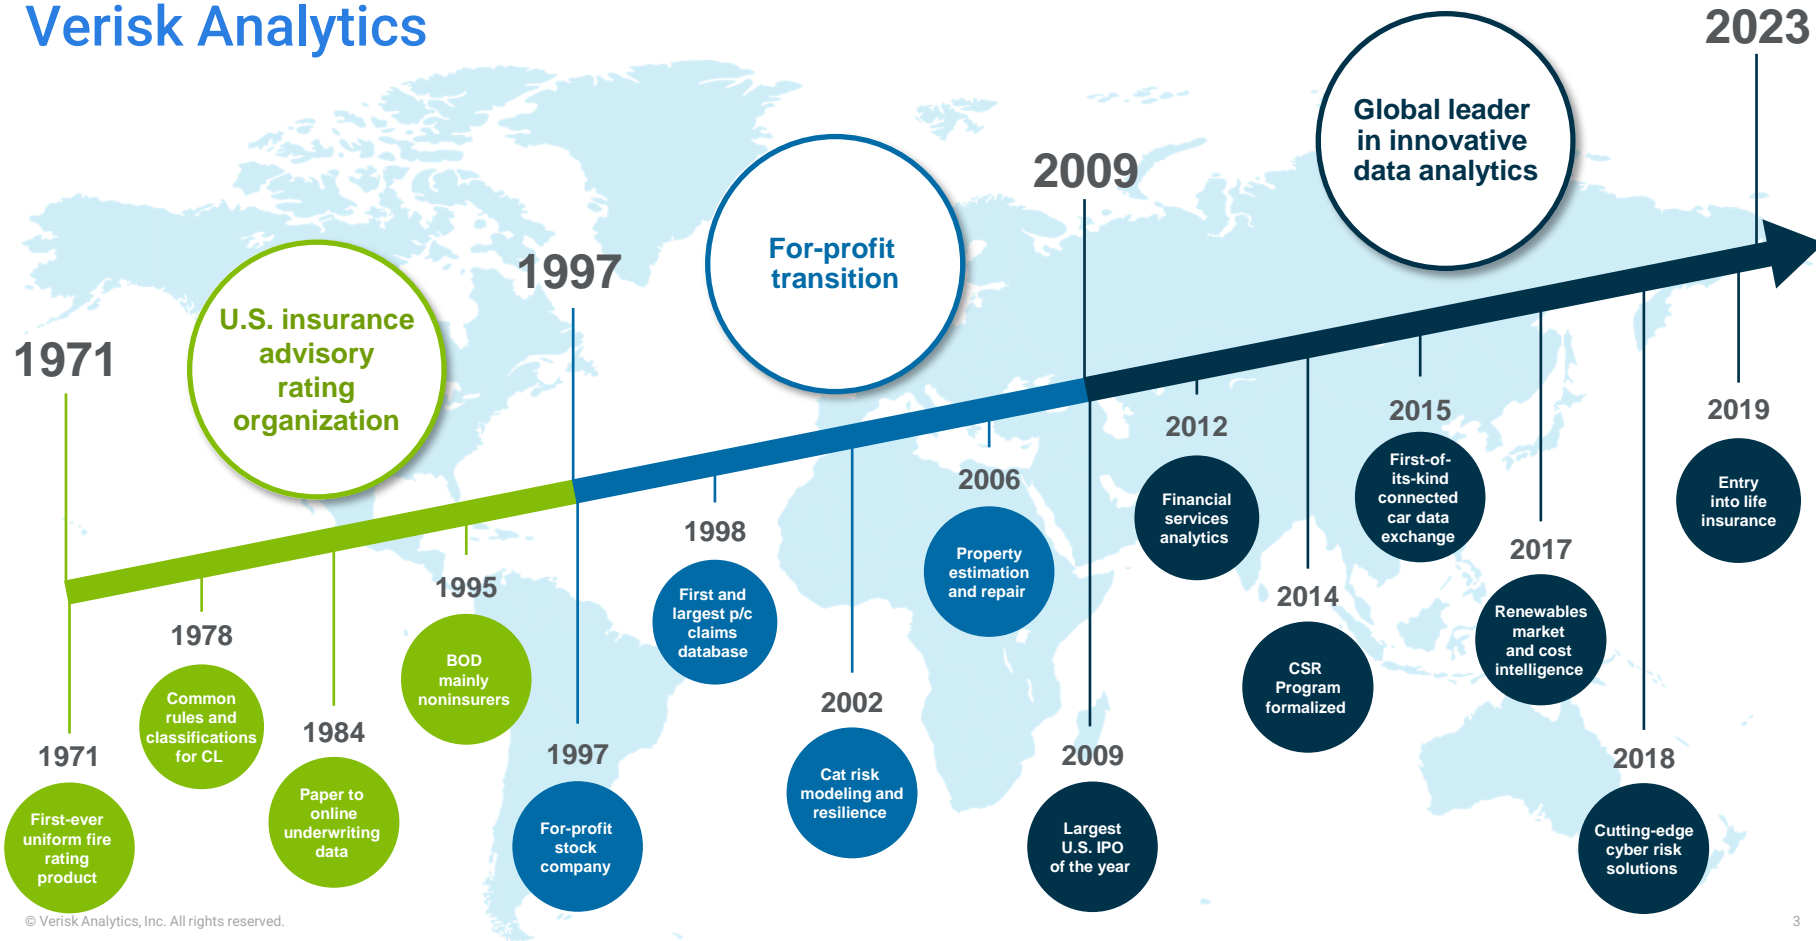

through conversational AI and machine learning

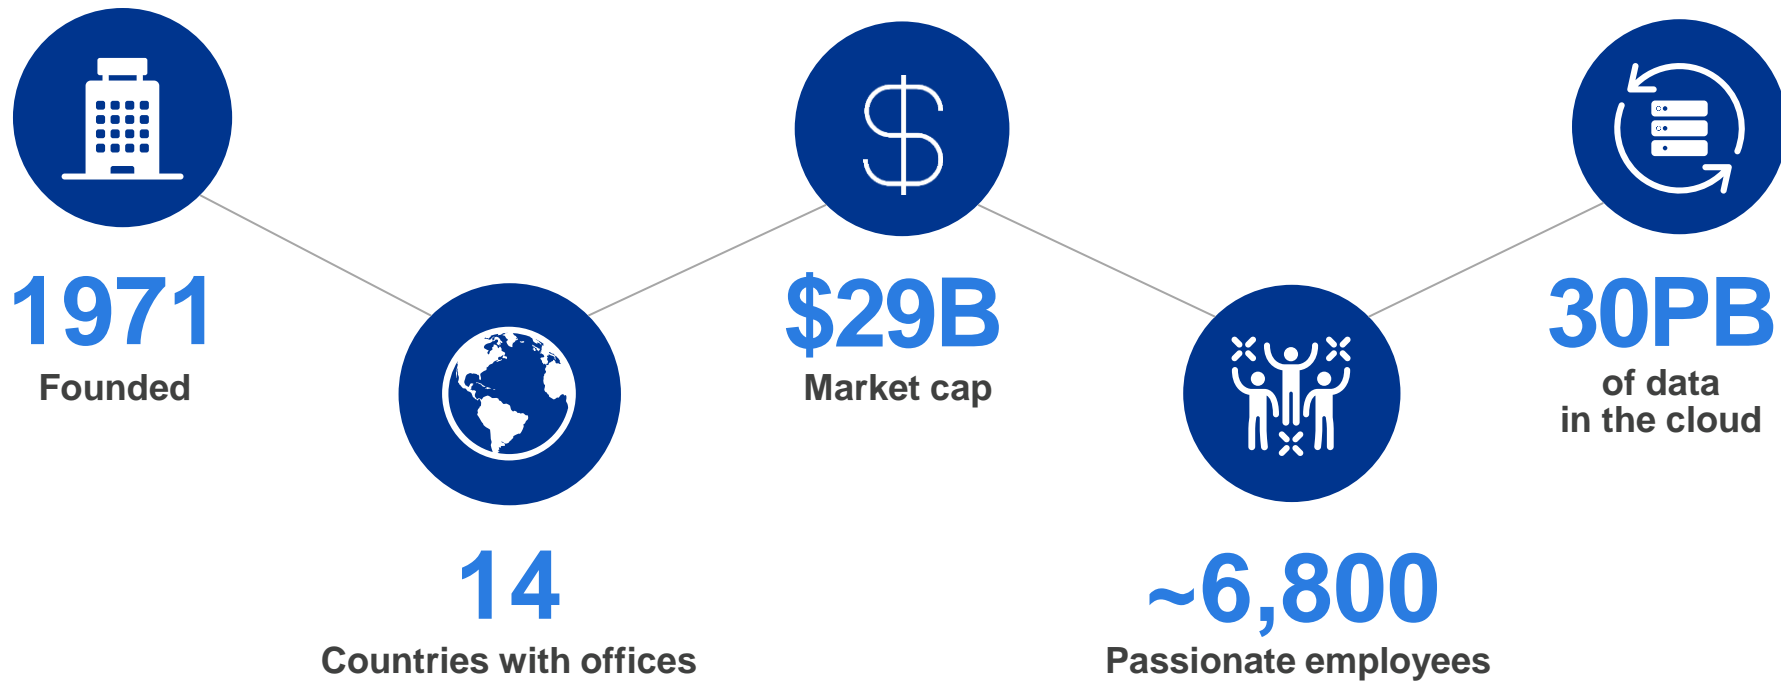

Verisk Analytics – Data for Conversational AI

Verisk Analytics

Serving the insurance industry for over 50 years

Verisk Ireland

- Main focus is Motor, where we provide live vehicle data on VRMs in ROI & UK
- Range of motor services and products available at point of quote or as part of a claims journey
- Data available through API or batch processes on VRM and Eircode for property
- Provide custom Alerts in a lookup, created to flag vehicles or properties on customisable logic
- Host the Insurance Link database on behalf of Insurance Ireland - details of Irish insurance claims

Motor Services

- Insurance Rating
- Insurance Alerts
- Customised Risk Alerts
- Full Vehicle History
- Drive Insight
- Quick Quote

Motor Data

- | | |
|---------------------------|------------------------|
| • Core Vehicle Attributes | • Variant Codes (ADAS) |
| • Technical Data | • Electric Vehicle |
| • Valuations | • Financial Stress |
| • Mileage | • MIAFTR & PNC |
| • Windscreen | |

USE CASES

**Motor
Quick
Quote**

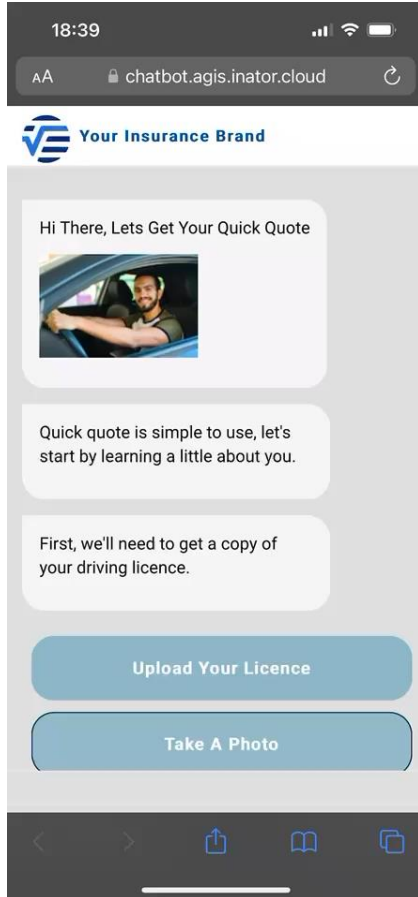

USE CASES : Motor Quick Quote

Motor Quick Quote

- Minimal Data Collection
- Car Registration, utilize Verisk Data for further data collection.
- Users License, extraction of user details.
- Data further enriched by Verisk for risk ratings, quotations etc.

USE CASES : Motor Quick Quote

Motor Quick Quote

- Minimal Data Collection
- Car Registration, utilize Verisk Data for further data collection.
- Users License, extraction of user details.
- Data further enriched by Verisk for risk ratings, quotations etc.

USE CASES

**Property
Claim**

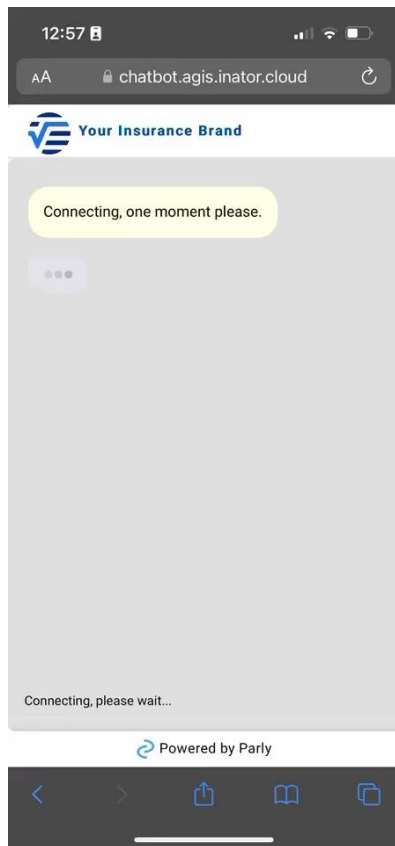

USE CASES: Property Claims

Property Claim Scenario

- Business process includes customer submission of proof of damage and receipt.
- Data Extractions from receipt and match against claims data.
- Note: Bot Launch includes case context data, inc. customer name, claim type, data etc. Deep link to avoid unnecessary customer dialogue.

USE CASES: Property Claims

Notes

- Deep linked context on launch.
- Guided user through the data collection process.
- Light weight client (no app)
- Automated extraction of receipt data.
- Highly configurable, part of a larger story.
